## Richard Sutton

Professor of Computer Science, University of Alberta

Richard S. Sutton is an Amii Fellow and professor at the Department of Computing Science at the University of Alberta, and a distinguished research scientist at DeepMind in Edmonton. Prior to this, he worked in industry at AT&T and GTE Labs, and in academia at the University of Massachusetts. He received a PhD in Computer Science from the University of Massachusetts in 1984 and a BA in Psychology from Stanford University in 1978.

He is co-author of the textbook Reinforcement Learning: An Introduction from MIT Press. He is also a fellow of the Royal Society of Canada, the Association for the Advancement of Artificial Intelligence and CIFAR. His research interests center on the learning problems facing a decision-maker interacting with its environment, which he sees as central to intelligence. He has additional interests in animal learning psychology, in connectionist networks, and generally in systems that continually improve their representations and models of the world. His scientific publications have been cited more than 70,000 times.
